Not much new content from the magazine article

By Peter Jacoby

I was impressed by the magazine article, and so was hoping to get more content from this version. It adds little to what is freely available on Time.com. I fully support magazines using inexpensive e-books for longer version of content, but I was hoping for more extensive additions. I think you can read the article in the magazine or online for free and you're not missing much.

The article itself is interesting and well-written, but the additional cost for the Kindle version is not worth it.

Amazing story of a remarkable young man.

By Richard

To put it in perspective from my point of view, I have golf balls older than Mark Zuckerberg. In just seven years, Zuckerberg has created a social network that, as pointed out in the book, if it were a country, Facebook would be the third largest country in the world. This from a 19-year-old kid who started a Web service in his dorm room. A Web service that now has over 550 million members and adds 700,000 members EVERY DAY.

What started out as a lark has transformed the world not to mention making Zuckerberg a billionaire. Facebook "makes possible social connections that never could have happened before, annihilating the time and distance that once separated people." All made possible by a teenager in his dorm room. He is the last generation that will remember life before the Internet. Think about that for a minute.

When he was just 12, Mark created a network at home called ZuckNet. If only we knew what would happen just seven years later.

Truly an amazing story of an amazing young man who simply changed the world. Five stars all the way.

Short, Sweet & Interesting!

By Lizmoot

The article didn't present too much information about Zuckerberg that I didn't already know, but it was a great read. The story did share some inside information about what goes on inside of the Facebook offices, which I wanted to hear. A good (short) read about Zuckerberg and how Facebook is changing the internet as we know it.
